KAVINRAJ S

Software Developer | Full Stack MERN Developer

kavinrajsaravanakumar@gmail.com | +91 9994814266 | LinkedIn | GitHub | LeetCode | Portfolio

SUMMARY

Software Developer with hands-on experience building full stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Skilled in Java, JavaScript, and SQL, with a strong foundation in data structures, algorithms, and databases. Solved over 300 problems on LeetCode. Selected as a national-level finalist at Smart India Hackathon (SIH) 2025. Completed a frontend development internship and built multiple full stack projects. Quick learner with strong problem solving and team collaboration skills, looking to contribute as a Software Developer or Full Stack Developer.

TECHNICAL SKILLS

- Programming Languages: Java, JavaScript, SQL, HTML, CSS
- Frontend: React.js, Bootstrap, Tailwind CSS
- Backend: Node.js, Express.js, RESTful API
- Databases: MongoDB, MySQL
- Cloud & DevOps: AWS(EC2, S3), Jenkins(CI/CD)
- Core Concepts: Object Oriented Programming (OOP), Database Management Systems (DBMS), Data Structures and Algorithms
- Tools: Git, GitHub, VS Code, Postman, Figma, IntelliJ IDEA

INTERNSHIP EXPERIENCE

Frontend Developer Intern — CodeNexIn (Rajni Tech Foundation)

January 2026 – May 2026

- Built responsive, user-focused web applications using React.js and Tailwind CSS
- Collaborated with a team to design and develop scalable frontend features
- Gained hands-on experience translating designs into functional web pages

PROJECTS

EcoLearn — Gamified Environmental Learning Platform (Team Project)

Role: Frontend Developer | React.js, Node.js, Express.js, MongoDB

- Built responsive React.js UI components for quizzes, games, and video modules as part of a 4-member team
- Connected frontend views to backend REST APIs to display real-time student activity and progress
- Selected among national-level finalists at Smart India Hackathon (SIH) 2025 for this project

PickMyLap — Laptop Recommendation Platform

React.js, Node.js, Express.js, MongoDB

- Designed and built a full stack MERN application end to end, including UI, REST APIs, and database schema
- Implemented a filtering algorithm to generate personalized laptop recommendations based on budget and requirements
- Modeled and queried product data in MongoDB for efficient retrieval across multiple filter combinations

URL Monitoring System

AWS EC2, Docker, Jenkins, Kubernetes (K3s), Node.js, Express.js, MongoDB Atlas

- Developed a URL monitoring system with real-time health checks, response time tracking, and an interactive dashboard.
- Deployed the Dockerized application on AWS EC2 using Kubernetes (K3s) to improve scalability and reliability.
- Automated CI/CD using GitHub, Jenkins, Docker Hub, and GitHub Webhooks for seamless application delivery.

PROBLEM SOLVING

- Solved 300+ Data Structures and Algorithms problems on LeetCode
- Strong foundation in Arrays, Strings, Collections, Maps, and Linked Lists
- Applied SQL and MySQL to build database-driven applications using JDBC

EDUCATION

B.Tech, Information Technology — Sri Shakthi Institute of Engineering and Technology, Coimbatore

Sep 2023 – March 2027 | CGPA: 7.9

SSLC & HSC — Government Higher Secondary School, Sirumugai, Coimbatore

June 2016 – March 2023 | 83%

CERTIFICATIONS & ACHIEVEMENTS

- Smart India Hackathon (SIH) 2025 — Selected as a national-level finalist and secured 3rd position (Dec 2025)
- HITAM Hackathon — Ranked in the top 10 teams for building a working solution in 24 hours (May 2025)
- Full Stack Development (MERN) — Completed hands-on training in frontend, backend, and database development (Sep2025)
